

Graphical Lockout Procedure Service

Brady's newest service provides:

- ▶ Machine specific, OSHA CFR 1910.147 compliant lockout procedures
- ▶ Visually instructive procedures that reduce the time to safely, quickly and consistently lockout equipment
- ▶ A fast, economical and complete OSHA compliant solution

Brady Professional Engineers will come to your facility and:

- ▶ **Perform a Zero Energy State Assessment**
Our hands-on test determines the ability of each piece of equipment to arrive at a state of zero energy
- ▶ **Develop Graphical Lockout Procedures**
Brady engineers create effective and easy-to-understand procedures for each piece of equipment, using the latest hand-held electronic tools and digital technology
- ▶ **Install Lockout Procedures**
Our crews strategically install the graphical procedures at optimal locations on the equipment, ensuring maximum usability and benefit
- ▶ **Create and Install Energy Source Tags**
Brady crews create and install color-coded energy source tags at each lockout point to visually, safely and quickly direct authorized employees to the correct energy source
- ▶ **Provide Easy Maintenance of the Lockout Program**
You'll receive electronic files and templates of the procedures, one binder with additional copies of the procedures, and one training session on maintaining the files.

Get Started Now!

- ▶ Contact your local Brady sales representative or distributor to set up a Graphical Lockout Procedure Assessment for your facility, or,
- ▶ Send John Rech of Brady Identification Services Group an up-to-date equipment list and we'll send you a firm proposal to create machine-specific lockout procedures at your facility. Phone: 1-800-496-4040 Fax: 1-800-221-6880 E-Mail: John_Rech@bradycorp.com.
