## MACHINE OPERATOR – CABLE MANUFACTURING

### Job Description: Machine Operator – Cable Manufacturing

#### Opportunity

The Machine Operator will be responsible for setting up, maintaining and operating cable manufacturing equipment. Manufacturing equipment includes screw extrusion process, cabling equipment, braider, twister, and re-spoolers. Candidate must be reliable, have the ability to work to standard hours, follow process documents, self-inspect work to mechanical parameters, and perform all work with attention to detail.

#### Essential Functions

- Set up machines (calibration, cleaning etc.) to start production cycle.
- Control and adjust machine settings (i.e. speed).
- Feed raw material or parts to semi-automated machines.
- Inspect parts with precision and measuring tools.
- Test operation of machines periodically.
- Resolve issues that occur during the shift.
- Inspect output for any machine-related mistakes or flaws.
- Keep records of approved and defective units or final products.
- Maintain activity logs.

#### Qualifications

- Must be able to legally work in the United States.
- Proven experience as a machine operator.
- Working knowledge of diverse high-speed machinery and measurement tools (caliper, micrometer etc.)
- Understanding of production procedures.
- Adherence to health and safety regulations (Personal Protective Equipment).
- Ability to read blueprints, technical documents and manuals.
- Analytical skills- proficient in basic math.
- Attention to detail.
- Teamwork and communication skills.
- Able to physically perform the duties of the job.
- High school diploma or equivalent; technical degree is a plus.
